

Want to start relieving carpal tunnel syndrome almost immediately...Even if you're been suffering for years, had surgery and tried almost everything under the sun?

## “Amazing New “Cold Laser” Therapy Is FDA Approved For Carpal Tunnel Syndrome, 75.6% Of Patients Showed Improvement, No Documented Side Effects...And Gets Results FAST!”

Discover how scientists have perfected incredible space-age technology that taps into the natural healing power of light and focuses it into a “cold laser” that’s as safe as a flash light and is working practically miracles for carpal tunnel sufferers all over the world. Now YOU can experience what 75.6% of carpal tunnel sufferers in a well documented FDA study experienced... RELIEF!

### **PLUS... Read On To Discover If Cold Laser Therapy Is Right For You And Best Of All... You Can Check It Out For FREE!**

By Dr. Andrew Jay Strauss, BS, DC, MSc  
Senior Lecturer, Open International University for Complementary Medicines  
Author, “Clinical Management of Chronic Low Back Pain”

Dear Carpal Tunnel Sufferer,

If you would like to know why so many carpal tunnel sufferers are calling cold laser therapy nothing less than a miracle... and... how you can check it out... absolutely free... this maybe be the most exciting and important message you ever read!

It may also be the longest report you ever read. (You may even want to print this out and read it on paper!)

Why?

Because it is about a very important subject: Your health.

And the decision you are about to make may have a dramatic effect on how you live the rest of your life...

### **With Carpal Tunnel Pain Or Without**

That decision is if you will or will NOT try cold laser therapy.

Personally, I think that decision is a simple one. In this report I will give you valuable information... and... an incredible FREE offer to... hopefully... make this decision a simple one for you too.

Quite frankly, this decision may be the most important one you ever make. So you need ALL this information.

If you are serious and motivated to discover if you are a candidate for cold laser therapy... and... if cold laser therapy can end your pain – I don't think you'll mind the length one bit.

**But you can't put this off.** You gotta take a look at this right now, while this report is still in your hands.

This is a rare and risk-free opportunity to finally find out if you are a candidate for cold laser therapy and how to possibly solve your pain fast. Don't let this opportunity slip through your fingers without at least seeing what it is all about.

## Here's what this is all about:

Whether you've just started getting carpal tunnel symptoms and they're not that bad (like your hands falling asleep in the middle of the night)... or... you've been suffering for years with unbearable, numbness tingling and pain that's ruining your life (and you've already had surgery)... or... anywhere in between... I'm about to make you the happiest person on the planet!

I'm serious. What I'm going to reveal in this report has the potential to solve your carpal tunnel pain... no matter how bad... in some cases almost immediately. And, as soon as you discover this secret for yourself...

## You're Gonna Wonder Why You Ever Had To Suffer At All!

Listen: I'll bet you the biggest steak dinner in Texas, you've tried all the so-called "miracle" drugs, wrists splints, physical therapy and wonder treatments and got little or no results. You've probably tried just about everything under the sun... and... you're still looking for real, lasting relief.

Many of my patients told me how frustrated they were. All the time, effort and money for nothing. They were just about ready to give up when they found me. I was there last resort after doctors told them they would just have to, "live with the pain."

Most likely doctors have told you that too. Or maybe you've heard this one, "We've done all we can do – you need surgery."

## While we're on the subject of surgery, here are some SHOCKING FACTS about Carpal Tunnel Syndrome:

The U.S. Department of Labor has concluded that carpal tunnel syndrome is the "chief occupational hazard of the 90's - disabling workers in epidemic proportions.

Carpal Tunnel Syndrome effects over 8 - million Americans.

Carpal Tunnel Syndrome is the #1 reported medical problem, accounting for about 50% of all work related injuries.

Only 25% of all Carpal Tunnel Syndrome patients were able to return to their previous professions following surgery.

Up to 36% of carpal tunnel syndrome patients require unlimited medical treatment.

Surgery for carpal tunnel syndrome is the second most common type of surgery, with well over 230,000 procedures performed annually.

With over 230,000 surgeries performed every year and only 25% able to return to their previous profession... it doesn't look like that's the answer. Even worse, if you are one of the unlucky ones, surgery could be a crippling mistake.

## Magic Wand...

Well, what if there was a magic wand that could erase most... if not all... of your carpal tunnel pain? And, what if that magic wand could get rid of your carpal tunnel and end your pain... for good... without popping handfuls of toxic drugs or having risky, ineffective surgery?

Better yet, what if that magic wand could do it... in many cases... almost instantly?

Well, guess what? There is no magic wand. But there is a carpal tunnel break-through that research has shown to have a

75.6% patient improvement rate with carpal tunnel syndrome that can possibly...

## Have You Out Of Pain Sometimes, In A Matter Of Minutes!

Don't laugh. It's 100% true. I know because that breakthrough is cold laser therapy, I have the documented proof... and... I see nothing short of miracles happening to my patients just about every day.

**Before we go any further, here's a little warning:** Not everyone has "miraculous" results. There is no such thing as "sure thing" when it comes to treating conditions that affect the human body. If you are looking for a 100% guaranteed cure... you won't find it in this report... or anywhere else.

Anyone that tells you they have a guaranteed cure... for anything... is a liar.

Antibiotics don't work for some people. Everyone responds differently to diet and exercise. And not everyone seems to respond to the laser.

A very small minority say the cold laser gave them no benefit at all. But with a well documented 75.6% patient improvement rate... I think you'd have to agree the odds are well in your favor. So if you can live with those impressive odds... let's get started with...

### The Fascinating Cold Laser Story:

Albert Einstein proposed it way back in 1917. It sounded like something straight out of a science fiction novel. The use of low-level focused light waves as a therapy to heal tissue. But, just like most of his brilliant ideas... Einstein was WAY ahead of his time and everyone laughed at him.

It's important to note... MOST of Einstein's brilliance was thought to be foolishness by the scientific community of his time. And nothing has changed. Scientific breakthroughs – especially in health care – are often violently opposed by the status quo. That is unless some big-wig corporate fat cats stand to line their pockets with silver.

Anyway, it was 43 years after Einstein's prediction that he was proven right and low-level light was first developed into a therapy. In 1960, Hungarian surgeon, Endre Mester, first reported his experience using laser light to treat non-healing infections and inflammations (swelling) in rats.

Mester's reported a 70% success rate treating these infections which led to the development of a science he called "laser biostimulation," or the stimulation of the local immune system.

Today there is an entire science field devoted to this subject call photobiology -- The study of how light effects living things.

Since 1967, more than 2,000 clinical studies have been published worldwide on cold lasers. Many of the studies are positive... but... many were small and not designed well enough to stand up to the scientific standards we have today.

### Overwhelming Proof

Recently, however, all that has changed.

One of the most difficult things I know is getting a patent and market clearance from the FDA for anything related to health care.

Well, in February, 2002 the first patent and market clearance was given to a cold laser for the non-surgical treatment of carpal tunnel syndrome. The patent and market clearance were granted after a cold laser manufacturer conducted double studies with General Motors and Baylor College of Medicine as part of their trials.

One of the numerous positive results was an amazing 75.6% of patients with carpal tunnel syndrome showed improvement.

And listen to this: the study showed the cold laser even worked on patients that already had surgery.

And with so many modern medical “cures” causing worse problems than the conditions they were initially intended to treat... one of the most important benefits was...

## **No Documented Side Effects!**

Not one.

The only warning was not to shine the laser directly in the eye for a prolonged period of time.

**Cold lasers are now being widely used in professional sports such as the USPS tour de France. Lance Armstrong, who captured his unprecedented 6th tour de France victory, received cold laser treatment... and the NFL football team THE NEW YORK JETS!**

Respected Members of The Medical Profession Embraced This Technology!...

## **What Is Cold Laser?**

Light comes in a variety of forms. The light that we see is the visible part of the spectrum of electromagnetic radiation. Just picture a rainbow. The light that is visible to us is a specific range of colors in that spectrum... but not the whole spectrum.

Other parts of the spectrum are not visible. Such as the ultra-violet light that tans (or burns) your skin.

Low-level laser light is compressed light of a wavelength from the cold, red part of the spectrum. Hence the name “cold laser.”

The cold laser is very different from natural light. When natural light hits your skin it produces heat that can damage your skin. Since a cold laser is one color, it travels in a straight line, is a single wavelength and its beam can be concentrated in a small area... it can penetrate the skin without heat, damage to your skin... or... any known side effects.

## **Two Types of Lasers**

This is very different from what most people think of when they think of a “laser.” I know I used to think of lasers I saw in the movies that burn holes or blow up things. That’s half correct.

In reality, there are two types of medical lasers: High power and low power. High power lasers are used to cut through tissue while low-power lasers stimulate tissue repair and healing.

# Cold Laser Therapy

Cold laser therapy is an application of red and near infrared light over an injured area to improve soft tissue healing and relieve both chronic and acute pain. Non heat producing or “cold” laser light energy directs light energy to the body’s cells without injuring them.

On the contrary... “cold” laser light dramatically boost the bodies natural healing response.

Since near infrared light waves penetrate the deepest of all the visible light waves... cold laser therapy optimizes the positive healing effects in the body. Such as:

- Relieves acute and chronic pain
- Increases the speed, quality and tensile strength of tissue repair
- Increases blood supply
- Stimulates the immune system
- Stimulates nerve function
- Develops collagen and muscle tissue
- Helps generate new and healthy cells and tissue
- Promotes faster wound healing and clot formation
- Reduces inflammation (swelling)

## Let’s Summarize:

In a nut shell, when red and near infrared light are focused in a “cold laser” and applied through the skin to an injured area... the bodies natural healing response is stimulated... and... in many cases... it heals faster and better than without the laser.

In plain ol’ English... Cold Laser therapy is safe and effective for decreasing pain and healing many conditions. Carpal tunnel syndrome is one of them.

## What Are Cold Laser Treatments Like?

Most cold lasers look like a flash light and emit a red beam of light. That beam of light is place over the cause of your carpal tunnel syndrome for any where between 3 and 15 minutes. The laser does not produce heat and is painless. Most patients say they do not feel anything at all. A few have reported a slight “tingling” sensation.

## How Many Treatments Do I Need?

That all depends on you’re individual case and must be determined by a laser trained and qualified physician. The length of treatment recommended in the FDA study is 15 visits. Many people say they feel substantial relief after just a handful of treatments. Some after just one.

**The good news in...** this is not something you have to continue to do for the rest of your life. So it is not a big commitment.

RIGHT ABOUT NOW THERE ARE ONLY  
TWO QUESTIONS YOU SHOULD BE ASKING YOURSELF:

**QUESTION #1: How do I find out if I am a candidate for Cold Laser Therapy?**

**QUESTION #2: How much is it going to cost me?**

**Here's the answer to #1:** If you could be here with me right now, I could show you, through computerized testing and examination procedures, EXACTLY what's causing you problem and if you are a candidate for cold laser therapy. I can also tell you if you have a condition that requires treatments I do not provide and send you to the appropriate doctor.

I could show you and explain to you in plain and simple English (no medical mumbo-jumbo most doctors give you) what's going on and how you can get better as fast as possible. How you can finally start getting your life back.

Here's A Sampling of What You Would Discover If You Were Here With Me Right Now:

**A consultation with me, Dr. Andrew Strauss, to discuss your problem and answer ALL your questions you may have about carpal tunnel syndrome and the cold laser. You will be taken by the hand and ALL your questions and concerns will be answered before you leave.**

A complete carpal tunnel/cold laser qualification case history and questionnaire to help determine if you are a candidate for cold laser therapy.

**A specialized Carpal Tunnel/Cold Laser Qualification Evaluation.**

**A written "Recommended Action Plan" giving you the results of your examination, tests, if you qualify for our cold laser program and what your options are. If at this point our evaluation reveals a condition that is better treated by other means, we will refer you to the appropriate Doctor.**

I could also show you the cold laser and demonstrate how it works. You could "see it for yourself."

How would you like to take part in that amazing evaluation for yourself? You can... without spending a single penny.

## **Here's the answer to #2:**

**Since I Can't Possibly Do That Evaluation And Show You If Cold Laser Therapy Will Work For You Without You Actually Being Here... I'm Willing To Give You That Exact Carpal Tunnel/Cold Laser Qualification Evaluation With All The Stuff Listed Above (\$245 value) ABSOLUTELY FREE!**

**Here's what to do now:** Just call my office at (845) 624-0010 and tell whoever answers the phone you want your "FREE carpal tunnel/cold laser qualification evaluation." It's absolutely free with no strings attached. There is nothing to pay for and you will NOT be pressured to become a patient. I don't need to.

Not at all. I have a very busy practice already, mostly by word of mouth. I honestly don't need any more patients. You will be given the information you came in for, told if you qualify for my cold laser program or what your best option is. From there it's up to you.

But if you want to give my system a try (as long as you qualify and we have an opening) you can take it for a test spin without risking a single penny! Here's how:

## **I'm Also Gonna Give You An Iron-Clad, No-Risk, No-Hassle, No Questions Asked Money Back Guarantee!!!**

Because I know I don't have a magic wand and there are no 100% cures out there, I go one step further. You see, I can not guarantee results. It is actually illegal for a doctor to guarantee results. But I can guarantee your satisfaction. If you qualify for care and are accepted and you are not happy for any reason within the first 10 days and I mean ANY REASON, I've give you ALL your money back... no questions asked! I dare you to find any other doctor that is willing to match this offer. No one else dares to match this offer because they know it would put them out of business!

Now, I can not tell you if you will qualify for my cold laser program, but if you do you have absolutely nothing to loose and possibly everything to gain.

**But you must do this right away.** As I mentioned above, I have a very busy practice already. Once the word got out about my cold laser, carpal tunnel sufferers started coming out of the woodwork.

Now that I've written this report and put it up on the internet, I honestly don't know how long this offer will last. I could literally get swamped with calls overnight and have to shut it down. I can only accept a limited amount of new patients every month.

I always want to make sure you get the individual attention your case requires so you get better as fast as humanly possible. For that reason... this offer could be suspended or cancelled at any time. Most likely I will be forced to start a waiting list.

So don't delay. Any "thinking it over" and you could be shut out. It's scary how fast word about my laser program is traveling. If you are even the slightest bit interested in what I've said in this report and finding out if cold laser therapy can end your pain and suffering... call (845) 624-0010 right now, while it is still on your mind and I still have openings.

You've spent so much time suffering already. Why not take 15 minutes of your time and find out the REAL cause and the REAL solution to your carpal tunnel syndrome... and make your life so much easier and better?

This is how you can finally take away the pain and open so many doors in your life that were slammed shut due to this crippling condition. Finally achieve all the things you easily could have without the pain and suffering of carpal tunnel syndrome constantly holding you back.

## **Here's Something To Consider:**

When you experience my cold laser system, see how quick and easy it can be to finally get out of pain... it's the most wonderful feeling in the world. If you continue doing what you're doing and it fails... like most carpal tunnel treatments out there... it can rip your heart out and destroy your life.

Your clock is ticking. Time is the most precious thing on earth. All the money in the world can not buy back any of the time you've already lost from pain and suffering. Not even one measly second. What makes you think things will change unless you have the courage to do something new, something radically different? That something new... something radically different is the opportunity you have in front of you right now.

That something new... something radically different is cold laser therapy.

It is worth 15 or 20 minutes of your time to see what I have to offer? Are you kidding me? If my cold laser system only works half as well as I know it does... it can mean a whole new life for you. When you finally get rid of the pain that has been holding you back, success and happiness can come flooding into your life. Occurring literally overnight.

Without taking this step, you may struggle forever. And still never discover the secret solution to your carpal tunnel. You can go to 50 other doctors and read 500 books and listen to all the "experts" in the chat rooms... and still not even come close to the awesome potential and power I'm about to hand you.

I can't even begin to understand anyone (who is serious about solving their carpal tunnel syndrome and living a happy pain-free life) would not JUMP on this opportunity - - immediately. So many people have been helped already and are pain-free today. It makes no sense for you to continue to suffer when you don't have to.

So what's it gonna be?

I've shouldered ALL the risk and you don't risk a single penny.

Call now. Don't get left out. And start a brand new life WITHOUT carpal tunnel syndrome... in as little as a couple treatments.

## One Last Thing - It's Really Important!...

Please remember... I can not possibly accept everyone on my program. Now that hundreds of people have requested this report and it's up on the internet I could easily get swamped very quickly. If that happens, I will have to stop the offer and start a waiting list. I did not write this report to get rich. I have a very busy practice already. No. I wrote this report because I honestly want to make a difference for so many carpal tunnel sufferers in the world. And I'm always amazed at how quickly and easily someone's life can completely turn around. Now with this report, I get the message out to many more people. It's exciting.

If you want to find out if you qualify for this amazing cold laser program... call right now. After all the carpal tunnel sufferers I have treated not one has ever asked for a refund. That's pretty phenomenal... and it proves this is the real deal... not just smoke and mirrors. This is very important. Call today.

### One more thing about this program...

You may be used to other carpal tunnel treatments out there. Ones that put you through painful test, grueling exercises and make you do a lot of "stuff." If that's what you are looking for -- you will be disappointed with my cold laser program. Frankly, treatments are short and you don't have to do anything at all (besides sit there and talk to me!) You don't even feel anything -- that is until the pain stops.

If you are asking yourself what this is worth... let me ask you... what is anything really worth?

Especially the specialized information and technology I am providing which bases it's value on the potential joy having such information and technology will bring to your life. Or the potential lost happiness you may suffer by NOT having it. By NOT having it... you may spend the rest of your life suffering.

You can buy a set of encyclopedias for about \$1,500 and there's a LOT of information... but it won't help your carpal tunnel syndrome one bit. **Or, you can try my cold laser program and it may solve your pain and suffering forever.**

How much is that "worth"?

Don't agonize over this decision like a death row inmate agonizes over the menu at his last meal. It really isn't that difficult. Any price I could have put on this evaluation would truly be insignificant when compared to the potential reward. And you get it all FREE.

## OK, one last thought...

It doesn't matter if your carpal tunnel syndrome is new... or you've been suffering for years and tried dozens of other things with little or no results. It doesn't even matter if you've had surgery. None of that matters one bit. The only thing that matters is your burning desire and urgent need to finally make it happen. Finally solve your problem.

Now that this is open to everyone on the internet, thousands and thousands of carpal tunnel sufferers will read this report, all fully aware of the immense potential. **Everyone who has an open mind and is willing to honestly look at the facts understands the power of this cold laser system is nearly infinite.**

Everyone knows how this cold laser system can instantly change your life in so many amazing ways... literally overnight. Yet most won't act. Most will pass it up and keep struggling. Why anyone does that is always a mystery to me. But there are an elite group of you that are willing to jump in with both feet and seize this opportunity. This group will, without a doubt, rise above the rest and finally get what they've always dreamt about.

I have a feeling YOU will be one of them.

Remember, I can only accept a very limited number of you for this free evaluation and on my program... and when those spots are taken, they are gone. I don't know if I will ever offer this again. At any price. I will most likely start waiting list... but you may have to pay the regular \$245 fee if that happens.

Please don't wait. Don't miss out.

Don't let something silly like that happen. You already know this is totally worth it. So give us a call (845) 624-0010. Our office is conveniently located inside the Nanuet Mall in Rockland County New York. We are close to Nyack, Spring Valley, Monsey, New City, Pearl River, and Bergen County New Jersey.

I'm already expecting your response.

**Yours in health,**

**Dr. Andrew Strauss**
